

GOVASSURE

Background

GovAssure is the new cyber security assurance approach for Government that replaces the cyber security element of the Departmental Security Health Check (DSHC). It is designed to improve the security of networks and information systems that are required for essential Government functions; building resistance against cyber attacks and known vulnerabilities.

Scope of GovAssure

GovAssure is designed for OFFICIAL systems and will apply to government sector Critical National Infrastructure (CNI), bringing them under a common assurance process for cyber.

GovAssure offers a customisable and adaptable approach tailored to your business needs, ensuring assessments are outcome-focused and proportionate, aligning with the specific risks encountered by Government bodies. With a user-friendly web interface, it streamlines the assessment process, making workflow and data input more efficient for teams. Integration of third-party reviews ensures an independent and unbiased assessment. Additionally, GovAssure establishes clear expectations for organisations with targeted improvement plans, facilitating focused efforts for enhancing performance and compliance.

How We Can Help

We provide GovAssure services to HMG. GovAssure is the cyber security assurance approach replacing the cyber security element of the Departmental Security Health Check (DSHC). Using the NCSC Cyber Assessment Framework (CAF) our Independent Assurance Reviewers provide a verification of your WebCAF self-assessment of in scope OFFICIAL systems.

Put our experience to work for you and move your projects forward with confidence.
